WARNING – SAFETY FIRST

High Intensity exercise must be approached cautiously in the beginning, a gradual ramp up of intensity is necessary to allow muscle cells to adapt to the new demands being placed on them. Failure to do so, opens the door to a life threatening condition called 'Rhabdomyolysis'. In short the muscle cells are damaged, flooding the bloodstream with toxins that can overwhelm the kidneys as they attempt to cleanse the blood, leading to potential shutdown. CrossFit can cause Rhabdomyolysis. It is important that you start at a reduced intensity. Brown urine, complete muscle weakness and/or swelling of joints are signs and symptoms of this condition. If you develop these symptoms seek medical attention IMMEDIATELY.
